*The Most Efficient Triple-Action System*

The Complete **BIOVENT ActionPlus** system has all the power of BIOVENT combined with a new concept that allows for even more thorough cleaning.

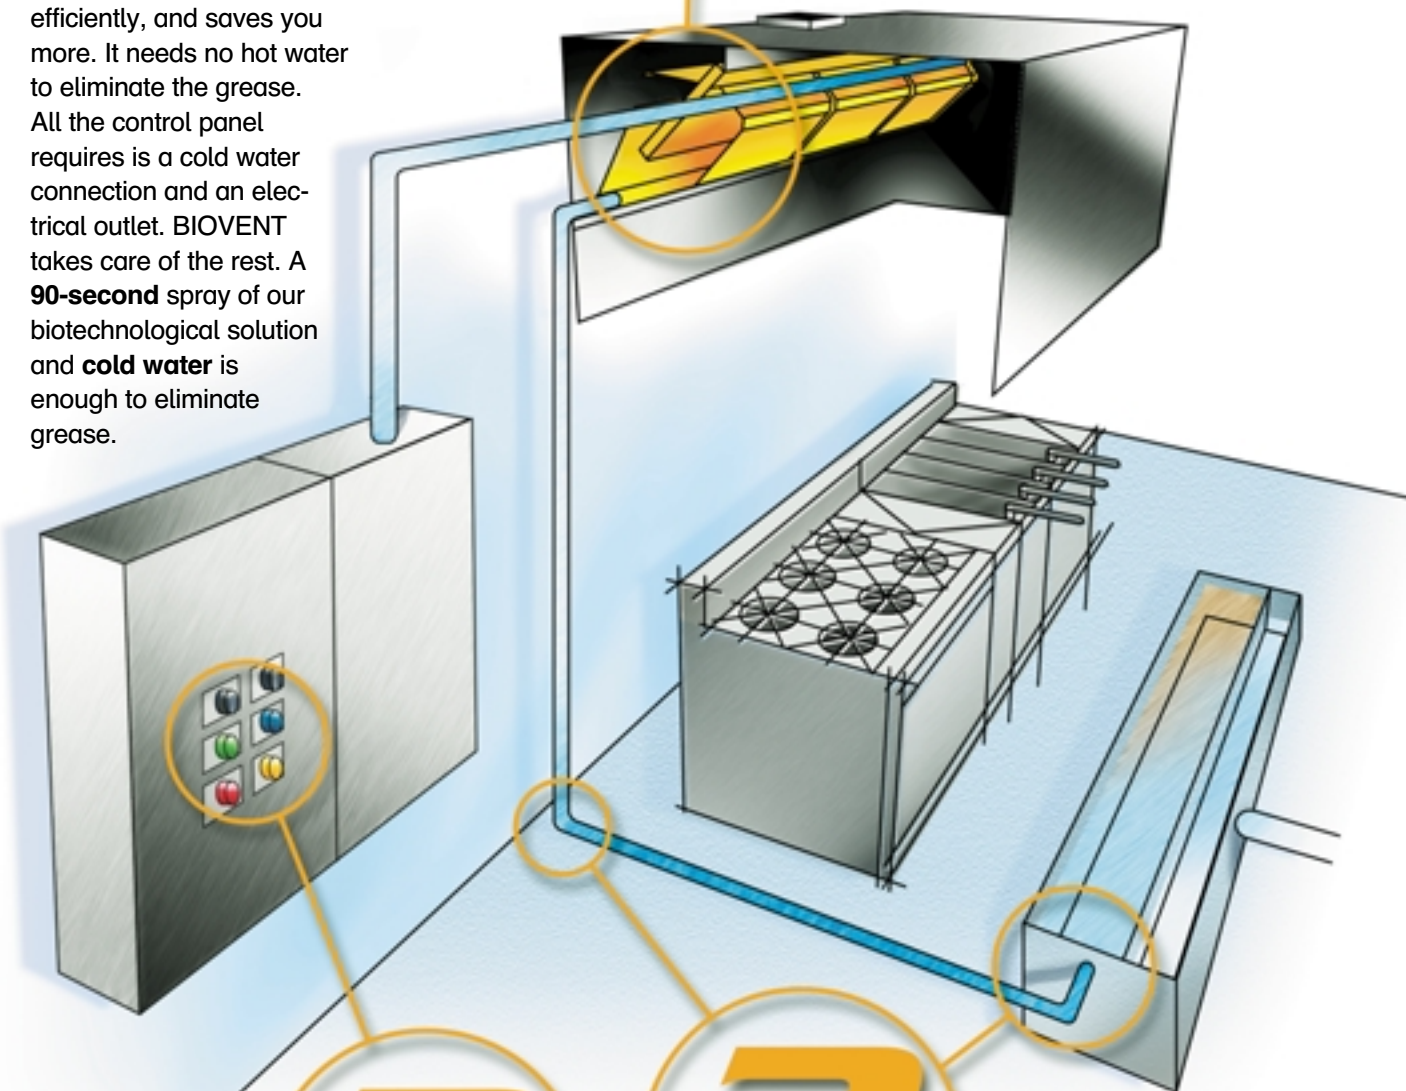

**BIOVENT ActionPlus**

is a triple-action system that cleans better, works more efficiently, and saves you more. It needs no hot water to eliminate the grease. All the control panel requires is a cold water connection and an electrical outlet. BIOVENT takes care of the rest. A **90-second** spray of our biotechnological solution and **cold water** is enough to eliminate grease.

**ActionPlus simplicity**

First and foremost is BIOVENT's proven ability to eliminate oil, grease, and other organic matter that gets trapped in your exhaust hoods over the course of the day. It is also a new drainage system that allows the active agents to clean the heart of your kitchen more thoroughly and completely.

**ActionPlus security**

Should there be a fire, the built-in system automatically sprays the interior of your exhaust hood in conjunction with the surface fire suppression system. It's a simple little thing, but it's one more layer of security to protect your investment.

**ActionPlus thoroughness**

After having cleaned your exhaust hoods, the BIOVENT solution drains into your grease trap, where it continues to eliminate accumulated grease.

**BIOVENT ActionPlus** takes care of everything for you and guarantees thorough cleaning effortlessly. All that with less time and money spent.

US Patent No 6125841. Canadian and Foreign Patents issued and pending.
